

DataTraveler Locker+ G3

kingston.com/usb

Personal data protection with automatic cloud backup.

Put a lock on your personal data with Kingston's DataTraveler® Locker+ G3. It's a safe and convenient way to secure receipts, bank statements and other sensitive documents with hardware encryption and password protection for a double layer of data security. The drive locks down and reformats after 10 failed login attempts, so users can rest assured their data is safe even if the drive is lost or stolen.

DataTraveler Locker+ G3 offers cloud backup as an optional feature. Users can choose to automatically back up data from their DataTraveler Locker+ G3 to Google Drive™, OneDrive (Microsoft®), Amazon Cloud Drive, Dropbox or Box, so if the drive is lost or stolen, their data is in a safe place.

Its USB 3.0 interface delivers speeds of up to 135MB/s read, approximately 2–3 times the speed of the previous generation, to secure files faster.³

DataTraveler Locker+ G3 is easy for anyone to set up and easy to use, with no application installation required; all the software and security needed is built in. It works on both Windows systems and Macs so users can access files from multiple systems, without installing a program on every computer used.

It features a durable metal casing to protect the drive from drops, bumps and knocks plus its built-in key loop makes it convenient to take your data anywhere. The cap fits on the back of the drive so it won't get lost.

DataTraveler Locker+ G3 is covered by a five-year warranty, free technical support and legendary Kingston® reliability.

- › Easy to use – no application installation required
- › Hardware encryption and superior password protection
- › Automatic cloud backup option to access your data anytime, anywhere
- › Customisable with your logo and/or digital files

USBtoCloud™ by CleVX, LLC (patents pending).

1 Minimum quantity required. Performed at the factory.

2 Some of the listed capacity on a Flash storage device is used for formatting and other functions and is thus not available for data storage. As such, the actual available capacity for data storage is less than what is listed on the products. For more information, go to Kingston's Flash Memory Guide at kingston.com/flashguide.

3 Speed may vary due to host hardware, software and usage.

4 First free drive letters after physical devices such as system partition, optical drives etc.
